

GENERAL JAVA

Viewed one time

Name General Java

Description For general Java code

 [Add Metric](#)

Metric Name	Collector Name	Metric Code
-------------	----------------	-------------

C) General Java Configuration

Metric Collector: Analizo

Choose a metric to add:

[Total Abstract Classes](#)

[Total Coupling Factor](#)

[Total Lines of Code](#)

[Total Number of Methods](#)

[Total Number of Modules/Classes](#)

[Total number of methods per abstract class](#)

[Total number of modules/classes with at least one defined attributes](#)

[Total number of modules/classes with at least one defined method](#)

[Afferent Connections per Class \(used to calculate COF - Coupling Factor\)](#)

[Average Cyclomatic Complexity per Method](#)

[Average Method LOC](#)

[Average Number of Parameters per Method](#)

[Coupling Between Objects](#)

[Depth of Inheritance Tree](#)

[Lack of Cohesion of Methods](#)

[Lines of Code](#)

[Max Method LOC](#)

B) General Java Configuration

Base Tools:

[Analizo](#)

[Checkstyle](#)

D) General Java Configuration

Collector Name: Analizo

Metric Name: Average Cyclomatic Complexity per Method

Description:

Code: amcyclo
